- Receive Patient Education
- Send/ Receive Emails

**MERGING BROADCAST TV WITH INTERNET**  
 Allowing your patients to fill their recovery time with self-directed content

Simple Connection  
 Instant Access  
 No Monthly Fees\*

Available as a module to be used in your existing PDI TV, or integrated into our new line of PDI Smarter TVs.

### INTERNET DONE RIGHT

PDI has worked with Intel to develop the next generation integrated healthcare solution.

A patient can watch regular TV, but with the ability to have a live pause (when viewing is interrupted by hospital staff), the television will store up to 1 hour of paused programming. Patients will not miss their favorite programs.

Smart TV functions include real-time streaming from external websites (Hulu, YouTube, etc.) as well as patient education websites directed by the healthcare facility.

Control of TVs from a central location is also possible - including software updates, firmware updates, central messaging and notifications. Widgets can also be programmed, including weather, sports, and news.

Surfing the web is now possible. But PDI's software does more than that - it allows a "reset" that erases a user's visited websites and other information.

Best of all, pricing is in-line with high-end consumer smart TV controllers - but with of course the healthcare expertise you trust from PDI.

### TWO WAYS TO GET SMARTER TV

PDI Provides two solutions

#### MODULAR

Plug-in for your current TV

#### INTEGRATED

On-board in the TV

"Finally, an web-based application specific television done right"
